IMPERMEABLE LAUNDRY BAGS

The impermeable laundry bag is a reusable, economic and environmentally friendly solution to handling soiled linen. High frequency welded seams prevent potential fluid leakages, whilst the colour coded Durotech top section allows the bag to be securely closed, minimising the escape of offensive odours. Heavy duty drawcord with industrial strength lock. Robust bottom handle. Four tabs for frame hanging.

Impermeable Laundry Bags

Following Colours Available AS Custom Options
Black, Brown, Orange,Pink,Purple,Mauve

SOLUBLE SEAM LAUDRY BAGS

For the safe containment and transportation of soiled or infectious linen. The soluble seam bag fulfills the need to effectively and conveniently treat contaminated linen. The soluble seam bag prevents the handling of contaminated line from its initial pick-up to completion of it

The seam dissolves in cold water, not the whole bag. The rest of the bag is LDPE low density polyethylene, which is thrown away at the end of the wash cycle

Features & Benefits

Construction

The soluble seam bag is manufactured from polyethylene with a dissolvable seam fixed down the middle of the bag. When the seam dissolves during the initial stages of the laundry cycle, the bag opens allowing the infectious and/or soiled linen to be released. A detachable soluble tie tape is also used to seal the bags opening.

Suitability

The opening allows linen to be placed into the bag with ease. The seam is located on the outside of the bag to prevent seam dissolving upon contact with the damp linen and during transportation.

Infection Control

The soluble seam bag liner confines the infectious linen inside the bag and prevents bacteria or infection transmission.

Colour System

The soluble seam bag comes in two colours to distinguish soiled red or infectious yellow linen.
